Supplementary Figure 1: Wind direction and windspeed observed during the study period 25 March 2021 to 25 January 2022 in Kimberley, South Africa.

Supplementary Figure 2: Five geographical origins of air masses identified in the 24-hour backward trajectory model runs on all days during the study period March 2021 to January 2022 in Kimberley, South Africa. North West (NW) is indicated by the blue line, North (N) indicated by the green line, East (E) indicated by the blue line, South West (SW) indicated by the pink line and West (W) indicated by the red line.
